

Did you know...

- Currently there are more American soldiers suffering amputations from the Middle East conflicts than any time since the Civil War.
- There are 235 new amputees every day in the USA just from diabetes.
- In total, over 3,000 people lose a limb in the USA every week.

Miracle Limbs – Courage in Motion was founded by Bob Ayres to support his fellow amputees during one of the most difficult transitions of their life.

Miracle Limbs mission is to actively seek pre and post surgical patients and provide a comprehensive support system based on their needs. This includes:

- Professional and Peer Counseling
- Financial Assistance
- Support Group Referral and Development
- Medical Referrals

Because of our 1st Bike Ride in 2009, we were able to raise enough money to assist six amputees including a man walk on his own... for the 1st time in 10 years! You can see more about Marco Orbegoso story in a video on our home page www.MiracleLimbs.org

Our 2nd Bike Ride and Hotel Auction will be on March 5th and 6th 2010. While there is never a shortage of need, we have a little boy that will be at the heart of our ride... and the primary beneficiary of your donations.

Jamarion is a six year old boy who at the age of eight months contracted a bacterial virus which began in his arms. Jamarion had to have his two arms amputated, one above the elbow and the other below the elbow in order to keep the virus from spreading into his main organs. Jamarion spent ten months in the hospital to recover and is now having to adapt to life with his residual limbs.
